Happy New Year and welcome to your latest issue of the NBB Outdoors catalogue! As we push through the winter months and start planning in earnest for sunnier weather and brighter days, this latest catalogue is here to help you ensure you are making the most of your school's outdoor space, all year round. From cycle and waiting shelters to canopies, bin storage, and recycled plastic furniture – we've got you covered!

I'm extremely proud to announce that you can SAVE up to 54% against competitors, with NBB, on best-selling shelters and street furniture. In a climate in which so many other costs have gone up, we hope that this, along with our market-leading guarantees of up to 25 years, gives schools the reassurance that every penny is a secure investment.

What's more, we despatch best-selling shelters and street furniture next working day when ordered before 2pm. There's no hidden fee for this service and it's completely free for applicable shelters and outdoor furniture (and only £9.50 for orders under £250)! With NBB, there are no hidden fees. The price you see is the price you pay.

And should you require something bespoke, be that custom sizing or something entirely purpose-built and installed, we'll get a FREE no-obligation quote to you in only 48 hours! There's nothing to lose in enquiring, and we even promise to beat any like-for-like quote (see page 5 for more details).

Call us on **0800 1777 052** to discuss your requirements or email sales@nbboutdoors.co.uk

Enjoy perusing this new year issue - we look forward to hearing from you.

Regularly Checked On Like-For-Like Products

The Latest Innovation In Industry-Leading Anti-Corrosion Protection

There are multiple variables that influence the speed of corrosion, such as the material of a product and the environment in which it is located. Knowing what the right anti-corrosion protection that meets your project needs is, can be complex.

AkzoNobel's 'Interpon Redox Triplex' is the answer to any and all variables, offering a multi-layer powder system that provides superior anti-corrosion protection and longevity compared to other coating solutions.

Treated to ISO 12944 standards, our Triplex-treated products come with an industry-leading 25-year guarantee, no matter the setting, so you can cut maintenance costs while achieving the highest performance levels.

Triplex' Key Benefits:

- **Maximum protection longevity**, guaranteed for an industry-leading 25 years!
- **Ultra-strong corrosion protection** performance up to the harshest category C5 environments
- Backed by AkzoNobel, with over 40 years proven performance and experience in more than 70 countries
- **A sustainable choice**; VOC-free and containing no solvents or toxic components
- **A total corrosivity solution**, combining the very best in barrier and cathodic protection
- **Ideal for high-humidity** and high salinity environments
- **Smooth surface finish** akin to furniture, with no zinc spikes or roughness
- **Applied to the very highest quality finish** – guaranteed

Read More Online Today!

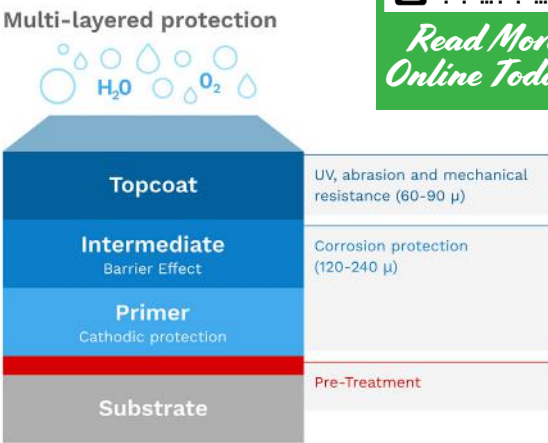

What Exactly Is Triplex?

Interpon Redox Triplex is your total corrosivity solution, combining the very best in cathodic protection and barrier effect anti-corrosion techniques, enabling treated products to remain fully operational even in the harshest high-humidity/salinity environments.

Cathodic protection is a method where the substrate metal is connected to a more reactive, zinc-rich 'sacrificial metal', that will corrode instead of the protected substrate.

Barrier effect protection isolates the substrate from its environment with a water and airtight primer. Oxygen and other corrosive agents are thus prevented from making direct contact with the steel, and consequently no corrosion can form.

The Triplex system layers these two technologies – alongside a UV-, abrasion- and mechanical-resistant epoxy polyester topcoat (in a colour of your choice) applied to BS EN 12206-1 – to provide extremely strong corrosion protection for environments up to C5 level.

Why Triplex?

Steel corrosion is the irreversible deterioration and destruction of the material, affected by factors such as ambient air temperature, the presence of chemical fumes and vapours, and humidity. The corrosive reaction severely compromises structural integrity and curtails the service life of the steel. And that's why NBB Outdoors are incredibly proud to be a Service First provider of Triplex multi-layer powder coating, the latest innovation in industry-leading corrosivity protection that's backed by AkzoNobel (the people behind Dulux), who to put it mildly know a thing or two about performance coating. All Triplex coated products are guaranteed for 25 years in even the harshest C5 classified conditions - the best guarantee you'll find on the market - giving you maximum performance from your product for longer than any other treatment.

Solution

Request A FREE Quotation

1. Take A Photo

Simply take a photo of the area you would like to put a shelter. Try to provide a few shots from different angles – the more we know about the area, the more detailed we can be!

2. Send A Photo

Send your photos, area measurements and requirements to sales@nbboutdoors.co.uk. We'll take a look at this and get in touch if we need more information from you.

3. FREE Quotation

We will raise a FREE no-obligation quotation usually within a couple of days after receiving your information. Inside your quotation pack you will find useful information such as case studies and links to free downloadable guides.

At NBB Outdoors we can design ANY shelter to meet your exact specifications. From walkways to designated waiting or smoking shelters, and cycle storage to street furniture, we take care of the whole process with you, from a FREE no-obligation quotation all the way through to manufacture and installation.

All our custom shelters are manufactured and treated to British (BS EN) and international (ISO) standards, guaranteeing your bespoke shelter for between 5 and a market-leading 25 years!

With hundreds of projects across the UK, our team of specialists have over 30 years' experience to create the perfect shelter for your premises.

Call 0800 1777 052 or email sales@nbboutdoors.co.uk today and get your FREE bespoke quotation.

We Won't Be Beaten On Price

You can save up to 54% on best-selling like-for-like shelters and street furniture versus competitors (correct as of December 2023). We're so confident of our competitiveness - regularly checked to ensure you're getting the very best value - that we also offer a price promise on Bespoke projects!

The NBB Bespoke Price Promise guarantees that we won't be beaten on price when it comes to custom shelter projects. That's why if you happen to have a cheaper quote for a Bespoke Walkway Shelter from another organisation, we'll beat it! We are confident that it will be hard to find anything of comparable quality from anyone else, for less. But if you do, just call our friendly sales team on 0800 1777 052 or email us at sales@nbboutdoors.co.uk with the details of your quote* and its price - as long as it's like for like, we will beat it!**

*NBB's Bespoke Price Promise applies to bespoke freestanding and wall attached walkway shelters only. NBB Outdoors will need to verify each quote is 'like-for-like' in order to beat the price. **Please note this does not apply to any orders that have already been processed or delivered.

Winterbourne Wall Attached Shelter
See p11

Childwall Sports & Science Academy, *Liverpool*

Childwall Sports & Science Academy, a returning happy customer of NBB Outdoors, sought to further enhance their campus infrastructure by installing a bespoke walkway between building entrances, to protect students and staff from adverse weather conditions such as rain, wind, and snow. The primary objectives were as follows:

Provide Weather Protection: Childwall Academy sought a sheltered walkway for their students and staff, particularly during inclement weather, to ensure comfortable and safe passage between building entrances. The shelter was to cover approximately 60 meters of pathway surrounding a recreational courtyard area.

Seamless Integration: It was imperative that the new shelter seamlessly integrated with the existing environment, including the school's building entrances, as well as our previous installation in 2021, which were all painted in Blue RAL 5002.

Durability and Longevity: Given the harsh nature of British weather, this shelter would be exposed to highly corrosive conditions. Our solution needed to have a long lifespan; Childwall Academy aimed to benefit from this investment for an extended period.

To meet Childwall Academy's unique requirements, NBB Outdoors designed and delivered a tailor-made L-Shaped Winterbourne Wall Attached Shelter,

including the following key features:

Precise Dimensions: The shelter's dimensions were meticulously tailored to fit the specific location, with one length measuring 36145x2000mm and the other 23940x2000mm. This precision ensured optimal coverage and protection within the defined space. The shelter included guttering and downpipes for effective rainwater management.

Colour Matching: The shelter was finished in Blue RAL 5002, aligning perfectly with the colour of the school's existing building entrances and our previous installation. This colour coordination not only complemented the existing surroundings but also enhanced the aesthetics of the campus.

Industry-Leading Anti-Corrosion Finish: The finished shelter was treated with Triplex anti-corrosion protection. This treatment provides industry-leading corrosion resistance and guarantees the shelter's durability for 25 years, even in the harshest C5-classified conditions.

NBB Outdoors were delighted to serve Childwall Academy again, underscoring the satisfaction and trust they have in NBB Outdoors' solutions and services. Childwall Academy can rely on their new shelter to serve its purpose for many years to come.

Winterbourne Freestanding Shelter
See p9

King Edward VI Northfield School For Girls, *Birmingham*

King Edward VI Northfield School For Girls, a distinguished educational institution, presented NBB Outdoors with a clear project brief aimed at enhancing their outdoor seating areas within a recreational courtyard. The principal project objectives were as follows:

Sheltered Outdoor Seating: The school aspired to establish a comfortable and welcoming outdoor seating area for students and staff, facilitating various activities such as dining, socialising, and studying. Protection from adverse weather conditions, including rain and sun, was a paramount requirement.

Aesthetic Integration: It was of utmost importance that the new shelters seamlessly harmonised with the existing school environment. This included integrating with the school's modern aesthetics characterised by uniform colour schemes in the main building's composite panelling and guttering.

Durability and Longevity: Given the investment in these outdoor shelters, the school desired structures that would stand the test of time and endure even the harshest conditions.

To fulfil the unique requirements of King Edward VI Northfield School For Girls, NBB Outdoors devised and implemented a bespoke solution encompassing the following key features:

Bespoke Design: Covering a combined 112 square metres and perfectly spanning the full width of the

paved courtyard, the two shelters provide ample space for students and staff to enjoy the outdoors comfortably. Additionally, each shelter has been sub-surfaced with the paving slabs reinstated to maintain a clean finish.

Rainwater Management: Guttering and downpipes were thoughtfully incorporated into the shelter design to prevent rainwater from cascading over the shelter's edges. This feature ensured that the outdoor seating area remained dry even during inclement weather.

Aesthetic Consistency: The shelters were finished in Signal Brown RAL 8002, in keeping with the school's modern aesthetic. This careful colour coordination seamlessly integrated the new shelters into the existing surroundings, creating a unified and visually appealing environment.

Corrosion Resistance: The freestanding shelters were treated with NBB Outdoors' industry-leading Triplex anti-corrosion finish, providing exceptional resistance to corrosion and environmental stressors. This finish guaranteed the shelters' durability for 25 years.

The new outdoor seating areas have contributed to an improved campus experience, providing students with a versatile and welcoming space to engage in various activities. By aligning with the school's aesthetic preferences, ensuring durability, and creating comfortable outdoor spaces, NBB Outdoors has exceeded the expectations of the educational institution.

Winterbourne Wall Attached Shelter
See p11

The Coombes CE Primary School, Reading

The Coombes CE Primary School engaged NBB Outdoors with a specific project brief aimed at improving the functionality and aesthetics of their school grounds. The primary project objectives were as follows:

Sheltered Pathway: The school required a sheltered outdoor area covering 16 meters of an internal corner of the building. Serving multiple entrances, they wanted to ensure that students, staff, and visitors could move safely and comfortably, regardless of the weather.

Integration: It was of equal importance that the new shelter seamlessly integrated with both the school's brand and uniform, matching the rich blue primary colour and incorporating the school logo onto the shelter.

Year-Round Protection: The shelter needed to provide year-round protection from all weather conditions, ensuring that the covered pathway remained dry, safe, and functional.

Diverse Installation: The project site included both concrete steps and tarmac, necessitating a combination of mounting variations to ensure secure installation.

To meet The Coombes CE Primary School's unique requirements, NBB Outdoors designed and implemented a bespoke L-Shaped shelter solution, offering a range of tailored features:

Full-Length Panelling: Clear polycarbonate glazing was affixed to the shelter, providing year-round protection from all weather conditions, making the sheltered pathways functional throughout the year. This feature ensured that students, staff, and visitors could move safely and comfortably, irrespective of the elements.

Branding Integration: The school logo was prominently printed on six panels of the shelter, showcasing the school's identity and creating a sense of pride among students and staff. Further, the shelter was gloss finished in Blue RAL 5002, enhancing the overall aesthetic appeal of the premises.

Considered Installation: To accommodate both tarmac and concrete surfaces, seven shelter posts were surface-bolted, while four were sub-surfaced, ensuring the shelter's stability and security.

As a further benefit, the resulting shelter received NBB Outdoors' industry-leading Triplex anti-corrosion finish, providing exceptional resistance to corrosion and environmental challenges. This finish guaranteed the shelter's durability for 25 years. By aligning the design with the school's brand, integrating the logo, and ensuring year-round functionality, NBB Outdoors has not only met but exceeded the school's expectations.

Funding & Grants Guide for Schools

Our latest Funding & Grants Guide provides details of many available grants and funds, summarising the key details in an easy to review way. These additional pots of money are available in the form of grants from trusts and foundations, as well as specific government departments.

National Lottery Community Fund England / Northern Ireland / Scotland / Wales

Funding Range: £300 to £10,000

Eligible Organisations: A not-for-profit group, Parish or town council, Schools or health companies, Charities, Co-operatives, Friendly societies, Industrial and provident societies

Suitable Projects: Better training and development access with greater opportunities for people to improve their life skills, More integrated communities, Improving the environment, Improve activity levels and health for people and communities

Application Process: Read the online guidance notes available from the website link below before you apply: complete and email the completed form to the email address provided, and a decision will be made in approximately 18 weeks

Important Dates: There is no deadline and therefore you can apply at any time

Web Address: tnlcommunityfund.org.uk/funding/under10k

Tesco Stronger Starts

Funding Range: Every three months, three local good causes are selected to be in the blue token customer vote in Tesco stores throughout the UK: first place receives up to £1,500, second place up to £1,000 and third place up to £500

Eligible Organisations: Voluntary or community organisations, Schools, Health bodies, NHS trusts, Parish/Town Councils and local authorities, Social housing providers

Suitable Projects: The following projects may be eligible to receive funding, although the list is not exhaustive of all opportunities: Improvement of local nature routes, Development of community allotments, gardens and growing projects, Developing sustainability-based learning programmes, Developing art trails, Park events

Application Process: An application form is available, which should be downloaded, completed and returned to the given address

Important Dates: Check the website for further details. Generally, applications can be made at any time owing to the monthly rolling award system

Web Address: tescostrongerstarts.org.uk

Persimmon Community Champions

Funding Range: Up to £6,000 can be donated to each project.

Eligible Organisations: Community groups and charities in the UK are able to apply, so ensure your school is a registered charity before you submit your form.

Suitable Projects: The scheme aims to find 'local good causes' and so a range of projects will be considered. Previous projects which were awarded funding include a primary school who received support to improve their outdoor spaces and a youth charity who were supported in funding new woodwork stations.

Application Process: There is a simple online form that needs to be filled in with details about the project and the school.

Important Dates: Funding is awarded on a quarterly basis so the application form can be submitted at any time during the year.

Web Address: persimmonhomes.com/community-champions
