650 □
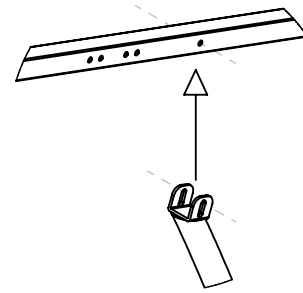

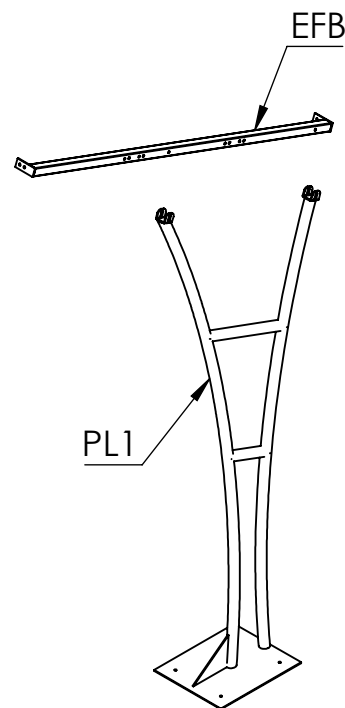

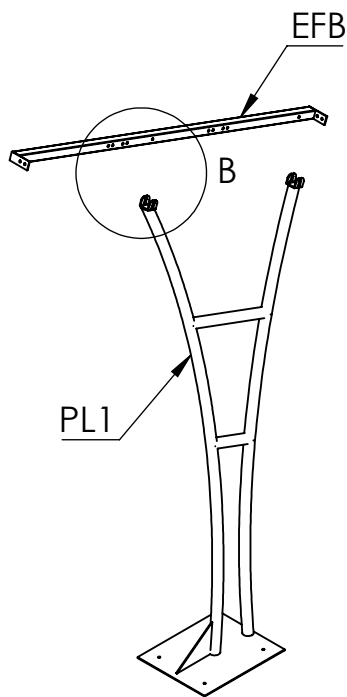

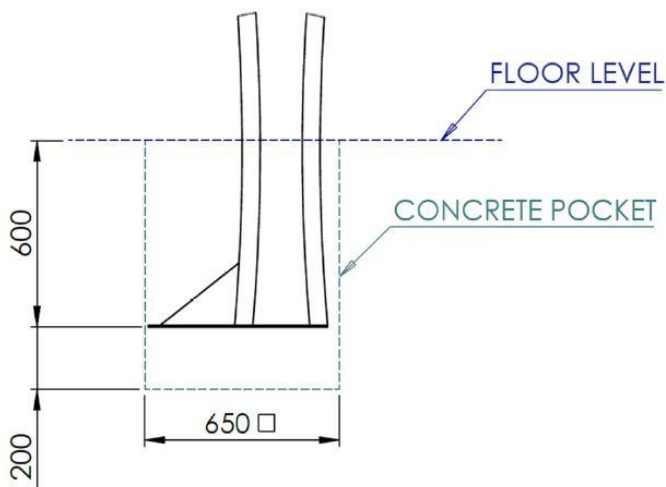

**Note: Move legs to desired location (shelter must be sub
surfaced 800mm minimum). Fix the central post in place
and build the rest of the shelter from this point.**

**Step 2**   Loosely fasten **FRB Front/Rear Bar** to **PL1Peveril legs,** this gives you the outside post positions.

FRB

Peveril Frame

**Note: A good spacing for
Tec-Screws is 200-300mm.**
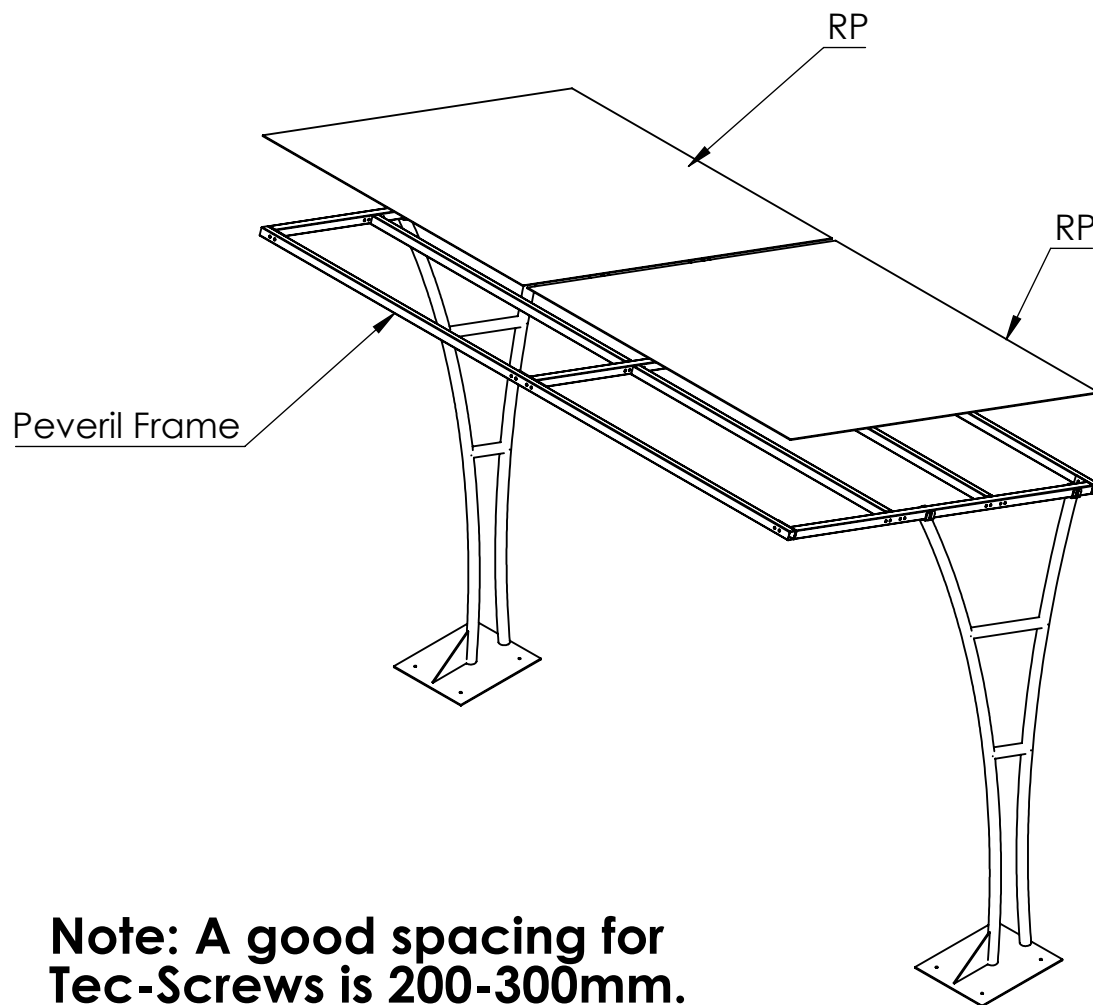

# THANK YOU
# FOR PURCHASING THIS PRODUCT

## <u>MAINTENANCE:</u>

To ensure your products give you many years of use we recommend that you:

- Clean panels regularly with soapy water
- Ensure all fittings are tight (for example after a big storm)
- Touch up any exposed metal should it get scratched
