

FAST FIX BASE

The unique Hispec Fast Fix base is a newly designed product that can be used to turn a standard smoke or heat detector into a premium, multi-functional unit.

Removable component gives the ability to wire directly into the alarm and therefore prevent the need for any additional terminal blocks.

Increased space between the terminal blocks allows contractors to wire freely into the alarms without obstruction or difficulty.

Conduit knockout entry that allows the installer to wire into our alarms laterally enabling them to be fitted in a multitude of different locations.

CAN BE USED WITH ALL HISPEC GRADE D1 AND SELECTED GRADE D2 ALARMS
