Introducing The Brand-New Portland Shelter, PLUS Much More!

As we say goodbye to the warmer summer months, it's time to prepare your outdoor areas for the harsher and varied weather conditions of the upcoming season. Whether you're looking to establish a weatherproof smoking area, create covered and secure cycle storage, or undertake a larger project to enhance the usability of your outdoor space year-round with a substantial shelter solution, NBB Outdoors has the expertise and solutions to meet your needs.

Are you searching for a reliable partner to design, manufacture, and install a custom-built bespoke shelter at your premises? Our free, no-obligation quotation service ensures we build to your exact requirements. Benefit from our Buy Now, Pay Later option with extended 90-day payment terms from the installation date on your bespoke shelter order! Plus, receive a completely personalised entrance sign for your business with your bespoke order FREE OF CHARGE (see page 3).

With our NEW Price Promise, we guarantee we won't be beaten on price. If you find a better price for like-for-like Shelters or Street Furniture, we will beat it. This promise extends to Bespoke Shelter projects as well—just send us a comparable quote from another provider, and we'll beat it!

In this issue, we are excited to introduce our new premier cycle shelter: the Portland Cycle Shelter and Compound. Featuring a contemporary design that enhances any modern urban landscape, this shelter is available in two sizes and two compound configurations. Invest in the ultimate cycle shelter solution today (see page 34).

Call us at **0800 1777 052** to discuss your requirements or email sales@nbboutdoors.co.uk. We hope you enjoy this new issue and look forward to hearing from you.

Decent quality and at a fair price with quick delivery. Good quality shelter, Brilliant! What more can you ask for?

Free Personalised Entrance Sign With Your Bespoke Order

Whether you're a business or school, a branded entrance sign goes beyond marking your premises. It creates a strong first impression, reinforces your brand identity, and helps visitors easily identify and navigate your location.

Understanding the value of this, we're including a completely bespoke, branded entrance sign with every bespoke shelter order—absolutely FREE of charge! It's our way of helping you maximise the impact of your investment while strengthening your brand's presence.

- For bespoke orders, we'll ask you as part of the process whether you'd like to redeem your free sign offer as part of the project - you don't need to request it.

FREE SIGN With Your Next Shelter

Complimentary ISO-Compliant Signage With Every Cycle & Smoking Shelter*

*For Cycle and Smoking Shelters, we'll send out your FREE sign with the order - you don't need to request it or add anything at the checkout.

Manufacturing Process

NBB
Outdoors

At NBB Outdoors, precision and innovation are at the core of our manufacturing. As an ISO 9001:2008 accredited company since 1990, we've consistently delivered quality, from prototyping to fabrication. We create tailored solutions for all budgets and environments. Proudly certified Made in Britain, all our shelters are manufactured in Poole, Dorset. Explore how we craft your shelter solution in house below:

Design

We start with detailed GA drawings, based on site surveys, to ensure they align with customer expectations. Drawings are sent to the customer for review and approval before moving on to production.

Precision Cutting

Steel is cut to size using our in-house machinery. Straight cuts are achieved with a band saw, while our CNC Tube and Pipe Plasma Cutter, handle intricate designs.

Steel Bending

Our cold rolling machine shapes shelters like the Kimmeridge and Lutton, while the Nargesa CC90 tube and pipe bender creates curves for bike racks and scooter racks.

Surface Preparation

Surface preparation is crucial before painting. We use shot blasting to remove rust, imperfections, and contaminants, while Phoswashing ensures a clean surface for optimal powder adhesion.

Precision Coating

Our coating process is customised for each product. From our Triplex process detailed below to our standard powder coating methods using zinc-rich priming followed by a topcoat for lasting protection.

Aftercare

Our commitment goes beyond production, with our installation team ensuring seamless integration and ongoing customer care, including after-sales support.

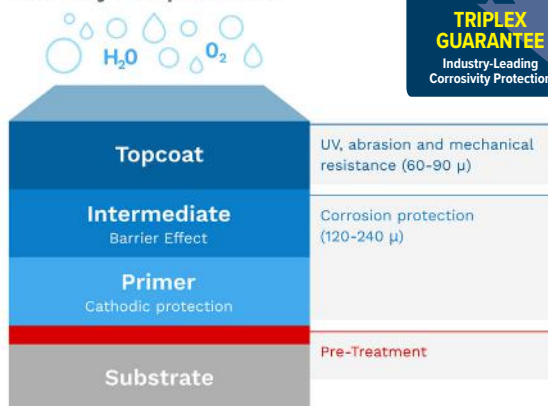

What Exactly Is Triplex?

Interpon Redox Triplex is your total corrosivity solution, combining the very best in cathodic protection and barrier effect anti-corrosion techniques, enabling treated products to remain fully operational even in the harshest high-humidity/salinity environments.

- **Maximum protection longevity**, guaranteed for an industry-leading 25 years
- **Ultra-strong corrosion protection** performance up to the harshest category C5 environments
- Backed by AkzoNobel, with over 40 years proven performance and experience in more than 70 countries
- **A sustainable choice**; VOC-free and containing no solvents or toxic components
- **A total corrosivity solution**, combining the very best in barrier and cathodic protection
- **Ideal for high-humidity** and high salinity environments
- **Smooth surface finish** akin to furniture, with no zinc spikes or roughness
- **Applied to the very highest quality finish** – guaranteed

Multi-layered protection

Look for the...

Why Triplex?

Steel corrosion is the irreversible deterioration and destruction of the material, affected by factors such as ambient air temperature, the presence of chemical fumes and vapours, and humidity. The corrosive reaction severely compromises structural integrity and curtails the service life of the steel. And that's why NBB Outdoors are incredibly proud to be a Service First provider

of Triplex multi-layer powder coating, the latest innovation in industry-leading corrosivity protection that's backed by AkzoNobel (the people behind Dulux), who to put it mildly know a thing or two about performance coating. All Triplex coated products are guaranteed for 25 years in even the harshest C5 classified conditions - the best guarantee you'll find on the market - giving you maximum performance from your product for longer than any other treatment.

unsightly and irreversibly destructive rust corrosion from 'standard' treatments

Buy Now, Pay Over A Longer Period!

When you order a bespoke shelter, you can take advantage of extended 90-day payment terms following the installation date. Which means you can buy now, pay later*.

*The customer will agree to pay the full invoice amount less any deposit already paid within 90 days from the date of invoice unless otherwise agreed in writing. Standard products are not included in this extension. NBB reserves the right to change, amend or end the payment terms extension at any time. Retrospective payment term extensions are not available.

'Triplex' powder coated to ISO 12944

Galvanised to ISO 1461

We Won't Be Beaten On Price

You can **save up to 57% on best-selling like-for-like shelters and street furniture versus competitors** (correct as of April 2024). We're so confident of our competitiveness - regularly checked to ensure you're getting the very best value - that we offer a price promise on like-for-like shelters and street furniture.*

What's more, we also offer a renowned **Bespoke Price Promise** that guarantees we **won't be beaten on price** when it comes to custom shelter projects, either. That's why if you happen to have a cheaper quote for a Bespoke Walkway Shelter from another organisation, we'll beat it! † We are confident that it will be hard to find anything of comparable quality from anyone else, for less. But if you do, just call our friendly sales team on **0800 1777 052** or email us at **sales@nbboutdoors.co.uk** with the details of your quote and its price - as long as it's like for like, we will beat it!**

†NBB's Bespoke Price Promise applies to bespoke freestanding and wall attached walkway shelters only. *NBB Outdoors will need to verify each quote is 'like-for-like' in order to beat the price. **Please note this does not apply to any orders that have already been processed or delivered.

New Installation

Model Shown: Custom Winterbourne Freestanding Shelter - See p21

Heatherbrook Primary Academy, Leicester

Heatherbrook Primary Academy contacted NBB Outdoors after recognising the need for a versatile covered area directly outside some of their classrooms, ensuring that pupils could utilise the space year-round. The primary objectives of the project were as follows:

Enhanced Versatility: The academy's mission was to introduce a purpose-built shelter designed to ensure that outdoor lessons and playtime could proceed without interruption. This shelter would primarily serve to protect students from rain, wind, and extreme temperatures, enabling them to engage in consistent learning and recreational activities in a safe and comfortable environment.

Safety and Security: The required shelter would be positioned directly outside the academy's early years classrooms, making it essential for the design to seamlessly integrate with the existing structures while also enhancing the safety and security provided by the pre-existing metal railing. Careful consideration was needed in the construction of the shelter to ensure that it not only complemented the current protective features but also reinforced the overall safety measures already in place.

Limitations and Restrictions: Given the residential area surrounding the academy, it was essential that the chosen installer strictly adhered to the predetermined installation timelines and operated within designated working hours. This adherence was vital to ensuring minimal disruption to the academy's ongoing operations and maintaining a respectful relationship with the local community.

To meet Heatherbrook Primary Academy's exacting standards and requirements, NBB Outdoors designed and installed a Bespoke Winterbourne Freestanding Shelter that comprised of the following key features:

Custom Design: After conducting a comprehensive site survey, it was concluded that a L18000mm x D5600mm sub-surfaced Freestanding Winterbourne Shelter would be the ideal solution to meet the academy's needs. The proposed dimensions provided a spacious sheltered area while also ensuring that the existing levels of security were maintained.

Custom Colour Matching: During the consultation process, it was agreed that a custom RAL paint colour would be developed to match the academy's unique turquoise branding. As a result, the final shelter was delivered in a striking Bespoke RAL Turquoise Blue, perfectly aligning with the academy's distinctive identity.

Rainwater Management: To effectively manage rainwater, guttering was installed on one side of the shelter, with rainwater pipework positioned as close as possible to the pre-existing ACO drain. This setup was designed to ensure efficient water runoff and prevent water ingress, thereby safeguarding the newly created sheltered areas and keeping them dry, even during inclement weather conditions.

NBB Outdoors' meticulous attention to detail, perfectly aligned with Heatherbrook Primary Academy's standards and brand identity. Our comprehensive approach made us the perfect partner to enhance Heatherbrook Primary Academy's learning environment.

New Installation

Model Shown: Winterbourne Wall Attached Shelters – See page 11

Woodlands Infant & Nursery School, Lincoln

Woodlands Infant & Nursery School approached **NBB** with a unique requirement: to create three individual sheltered areas outside their classrooms, providing pupils and parents with year-round weather protection during drop-off and pick-up. The key objectives of the project were as follows:

Purpose Built Solutions: The school determined that three separate shelters were essential to meet their needs. Each shelter required custom design, including appropriately placed pipes and guttering to effectively manage rainwater runoff. This approach was crucial for ensuring that the shelters remained functional in all weather conditions, addressing the school's specific requirements.

Safety and Protection: Given the young age of the children attending the school, safety was of the utmost importance. Therefore, the design needed to include padded post protectors, which would offer enhanced protection and help prevent injuries during playtimes. These features were essential to create a safe and secure environment, addressing the specific needs of the pupils and ensuring their well-being while they engaged in outdoor activities.

After carefully considering all the requirements set out by Woodlands Infant & Nursery School, NBB designed and installed three individual Winterbourne Wall-Attached Shelters with the following features:

Tailor Made: The proposed shelters were meticulously measured and customised to fit the specific site

requirements. The shelter outside the Maple Classroom was designed with dimensions of L7550mm x D3000mm x H2300/2750mm. The solution for the Pine Classroom featured dimensions of L7550mm x D3000mm x H2300/2800mm, while the ideal shelter for the Holly Classroom was determined to be L7300mm x D3000mm x H2300/2800mm.

Project Management: Given the constraints of limited space and busy school terms, it was specified that the installation of the three shelters could only occur during school holidays. The NBB installation team successfully met a tight timeline and adhered to strict working hours to minimise noise disruption to the surrounding urban area.

Precision in Execution: Each shelter was meticulously crafted to fit the unique space outside its designated classroom. The design process included custom solutions for drainage as well as tailored padded post protector sizing and placement. These elements were individually designed and installed to ensure that every aspect of the shelters met the specific requirements of their locations, achieving a precise and functional fit for each designated area.

With a keen focus on detail and design, NBB successfully delivered three precisely tailored shelters for Woodlands Infant & Nursery School. These shelters met the project brief perfectly and are set to provide sheltered and secure areas for children, parents, and staff for many years to come.

Free Standing Shelter - See p9

Chorley St James CE Primary School, Lancashire

Chorley St James CE Primary School reached out to NBB Outdoors with the specific requirement to create a sheltered area that not only provided functionality but also featured a modern aesthetic that seamlessly integrated with the existing school building. The primary objectives of the project were as follows:

Ensuring Enhanced Security: The school was specifically seeking a shelter that could endure all weather conditions, from heavy rain and strong winds to intense sunlight and snow. Additionally, they required the shelter to be backed by a long-term guarantee, ensuring durability and reliability over the years.

Limitations and Restrictions: The school required an installation team capable of handling the complex logistical and construction challenges posed by the varying window locations. This meant the successful team would need to customise the positioning of posts and the shelter itself to accommodate these obstacles, ensuring a seamless and effective installation without compromising the building's structure or aesthetics.

To accommodate Chorley St James CE Primary Schools needs, NBB Outdoors custom built and installed a Winterbourne Freestanding Bespoke Shelter solution that delivered the following features:

Bespoke Design: Following a thorough site survey and detailed conversations with the school, it was agreed

that a L6600mm x D5000mm x H2900mm sub-surfaced Freestanding Winterbourne Shelter would best meet the specific requirements of the project.

Exacting Standards and Requirements: Special attention and consideration were given during the initial design and drawing process to ensure the proposed dimensions accommodated the specific custom post placement requested by the school. The limitations and restrictions due to existing window placements were meticulously reviewed and incorporated into the final design.

Expert Finishing: Working closely with the school to provide sample finishes and colour matching, the final shelter was manufactured and installed in a striking Yellow RAL1021 finish. This choice ensured the shelter complemented the academic surroundings and enhanced the school's brand image.

NBB Outdoors proved to be the perfect partner for Chorley St James CE Primary School by delivering a bespoke shelter that met both functional and aesthetic demands. Our comprehensive and tailored solution made us the ideal choice for enhancing the school's outdoor space.
