# Why Choose Recycled?

As we all know, the amount of plastic waste each year is staggering, and our eco-friendly recycled plastic furniture range can help save thousands of plastic bottles from entering landfill.

The benefits of recycled plastic significantly outweigh traditional timber. Considering both financial and environmental factors, recycled plastic is considerably superior to its timber or metal equivalents.

We manufacture all our products from 100% Recycled High-Density Polyethylene (HDPE). When recycled, it is an extremely hardwearing, versatile material, making it a perfect choice for all-weather outdoor furniture. It has a significantly lower carbon footprint than timber or metal equivalents, using less energy and water and emitting lower levels of CO<sub>2</sub> in its production.

## Cost Comparison between High-Quality Timber and Recycled Plastic Picnic Tables\*

\*Based on the logic from an original study conducted by WRAP (Waste and Resource Action Programme)

**We are extremely proud that sales of our products have recycled over 160 million bottles so far!**

## Did you know?

1kg of material is derived from 28 2-litre HDPE plastic bottles. Look for this symbol to see how many plastic bottles are saved for each piece of furniture.

# Closed-loop Recycling - Our Manufacturing Produces Zero Waste

### Step 4

The parts are transformed into strong and robust recycled plastic furniture with any offcuts or plastic waste material recycled and reused!

### Step 3

With the aid of melting and intrusion, the granules are mixed into a plastic compound to produce high quality finished parts

### Step 1

High-Density Polyethylene (HDPE) plastic bottles are collected

### Step 2

At the reprocessor, the recycled plastic is washed and cleaned and broken down into granules
