Drill/Screwdriver

Mallet

Tools required:

17mm Wrench

T25 Torx bit

Step 1 Assemble **S1C** frames to make up the main structure using **CB1** brackets for the Corners and **JF1** brackets for the straight joints. Use **JF1** and **CB1** brackets to attach the **ST1** tie bar.

MEASURE THE WIDTH AND DEPTH OF THE SHELTER TO CHECK CORRECT ALIGNMENT.

Step 2 Attach **AR1R** rafters using **DR** brackets. Secure the **AR1IS END PANELS** to **S1C** frames using tec screws. The end rafters need to be placed in position at the same time as the **END PANELS**.

Step 3

Attach the **AR1CLT2** to the top of the rafters. The **ARFS2** parts are to be attached to the lower part of the rafters as shown below.

Step 4

Attach the **AR1POA** roof panels to the the rafters.

Cap off the top using **AR1CUT2** trim as shown.

Use the **AR1TS** strips to cover the gaps between the panels.

Once the shelter is in the final position and square, it can be secured to the ground using the **FT3** and **FT1** brackets and concrete bolts.

PLAN VIEW

OVERALL DIMENSIONS AND GROUND FIXING POSITIONS

Suggested size for concrete base: 8inch oversized on all 4 sides.

THANK YOU FOR PURCHASING THIS PRODUCT

MAINTENANCE:

To ensure your products give you many years of use we recommend that you:

- Clean panels regularly with soapy water
- Ensure all fittings are tight (for example after a big storm)
- Touch up any exposed metal should it get scratched
