Pack A+B	33	33	66	136	40	66	11
Image							

Tools required:

Drill/Screwdriver

17mm Wrench

Mallet

T25 Torx bit

Step 1 Assemble **S1** and **S3** frames to make up the main structure using **CB1** brackets for the corners and **JF1** brackets for the straight joints.

Step 2 Attach **ST15** Tie bars to **SC** frames using **CB1** Brackets. Fix the **ST3** Tie bars to the **ST15** bars using **CB1** Brackets and attach to the **P5** Post using the **JFT** bracket.

Step 3

Attach **AR1R** rafters using **DR** brackets. Secure the **AR1IS** End Panels to **S1** frames using 1" tech screws. The end rafters need to be placed in position at the same time as the **AR1IS** End Panels.

Step 4

Attach the **AR1CLTO** and the **AR1CLTI** to the top of the rafters with the **AR1CLTO** on the outside and the **AR1CLTI** on the inside. The **ARFSO** and **ARFSI** parts are to be attached to the lower part of the rafters as shown below.

Step 5

Attach the **AR1POA** and **AR1PIA** roof panels to the top of the rafters. Cap off the top using **AR1CUTO** and **AR1CUTI** trim as shown. Use the **AR1TS** strips to cover the gaps between the panels.

Once the shelter is in its final position and square, it can be secured to the ground using the concrete bolts and **FT3/FT1** brackets.

PLAN VIEW

OVERALL DIMENSIONS AND GROUND FIXING POSITIONS
Suggested size for concrete base: 8" oversized on all 4 sides.

THANK YOU FOR PURCHASING THIS PRODUCT

MAINTENANCE:

To ensure your products give you many years of use we recommend that you:

- Clean panels regularly with soapy water
- Ensure all fittings are tight (for example after a big storm)
- Touch up any exposed metal should it get scratched
