* NOTE: THE 1 1/2 inch TECH SCREWS ARE FOR FIXING ROOF COMPONENTS ONLY

Tools required:

Drill/Screwdriver

Mallet

Tools included:

WRENCH

Torx bit

Step 1 Assemble back and side frames **S1C** as shown below. Using **JF1** brackets for the straight joints and **CB1** brackets for the corners.

IMPORTANT: Make sure side frames are aligned as detailed below.

Step 2 Attach front **S1** frame and **ST3** tie bar using **CB1** and **JF1** brackets.

Step 3 Secure the **DR1R** roof rafters into place using the **DR** Brackets. The **DR1I** infill panels are screwed into place using 1" tech screws but must be placed into position at the same time as the end rafters.

Step 4 Line up the roof sheets **DR2PO/DR2PI** as shown below. Install the **DRAT2** Angle trims to the bottom of the roof panels and using the 1.5" Tech screws, this will secure the roof sheets.

Step 5 Seal the central gaps and edges with the **DR1T** strips. Once the shelter is in its final position and squared up, attach the **FT1** and **FT3** foot brackets and use anchor bolts to secure everything to the ground. Finally fit the black plastic caps on exposed nuts and bolts.

Plan View

Suggested size for concrete base: 8 inch oversized on all 4 sides.

THANK YOU FOR PURCHASING THIS PRODUCT

MAINTENANCE:

To ensure your products give you many years of use we recommend that you:

- Clean panels regularly with soapy water
- Ensure all fittings are tight (for example after a big storm)
- Use metal paint to touch up any exposed metal should it get scratched
