Step 1 Assemble **S1** frames to make up the main structure using **CB1** brackets in the corners and **JF1** brackets for the straight joints.

MEASUREMENTS IN BLUE - MM

MEASUREMENTS IN GREEN - INCHES

TOP VIEW

Step 2 Move the shelter in to its final position, make sure it is square and attach **FT1** and **FT3** foot brackets, which screw into the ground with the concrete bolts. Attach **JF2** brackets to **S1 Stubs**. Using **CB1** and **JF1** brackets, secure **S1 Stub** to frame. Now fix the **RB1** brackets to the rear of the frame, attach **R4** rafters. Use **L1** brackets to attach **ST8** tie bar.

Step 3 Apply sealing strips (**SS**) to rafters. Align the two **PCE2** roof panels with the outer edges of the shelter, leaving a gap in between the panels.

Step 4 Use **RC2** strips to cover the gap in the centre and the edges and screw them directly into the frame using **38mm TEC screws**. Finish of the shelter by attaching the **2MD** edge trim, then finally, fit the Black plastic caps on exposed nuts and bolts, and fit the square end caps (**EC40**) to any open ends of box sections.

Plan View

Suggested size for concrete base: 200mm/7.87in oversized on all four sides

Notes:

Notes:

Notes:

THANK YOU FOR PURCHASING THIS PRODUCT

MAINTENANCE:

To ensure your products give you many years of use we recommend that you:

- Clean panels regularly with soapy water
- Ensure all fittings are tight (for example after a big storm)
- Touch up any exposed metal should it get scratched
